

## Aston Martin DB6 Vantage

£POA

This fabulous DB6 Vantage left the Newport Pagnell factory in its original Oystershell paintwork and Red Connolly hide interior. Original factory options were Vantage engine, chrome wire wheels, heated rear screen, 3 ear hubs and power operated radio aerial.

The first owner was Prince Nicholas Von Preussen. Eldest son of Prince Frederick of Prussia and Lady Brigid Guinness (a descendent of the brewing family). The car was first registered on Prince Nicholas's 21st birthday. Soon after the car was returned to Newport Pagnell for the fitment of air conditioning.

Desmond J Smail sold the car in 2013, where upon the owner asked Desmond to proceed with a full nut and bolt, no expense spared restoration. This included: Full Body Lines body and chassis restoration. Full engine rebuilt to 4.2 unleaded specification. Painted in Cumberland Grey. Complete retrim in red. (Trimmed by Desmond's own ex factory trimmer Joe Dorrill, who had also trimmed the car when new.

Still in as new condition today with only 1,000 dry / sunny miles covered since.

Acompanied by a fully documented restoration file, this matching numbers, manual, Vantage, air conditioned DB6 presents flawlessly.
