

## Aston Martin DB6 MK11 Vantage

£POA

This lovely DB6 Mk11 Vantage Manual ticks every box. It has just completed the Aston Martin Works Assured Provenance Certification with flying colours.

Finished in Silver Birch with its original Dark Blue hide interior. It left the factory in June 1971 in Celese Blue with Dark Blue hide, manual transmission, Vantage engine and fuel injection. As with most of the fuel injection cars it was converted in period to triple Webber carburetors.

There is a comprehensive history file showing restoration and maintenance work, including chassis and sills and most recently a full engine rebuild by R S Williams to 4.7 litre specification.
